Severn, MD | 757-386-0409 | christiantaylor.cyber@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Cybersecurity professional with hands-on experience across consulting, SOC operations, and endpoint security. CompTIA Security+ and ISC2 CC certified, with a proven record of leading phishing campaigns, dark web monitoring, and vulnerability scanning. Skilled in triaging security events with Splunk and Security Onion, scripting with Python and PowerShell, and communicating technical findings to non-technical stakeholders.

TECHNICAL SKILLS

Security Domains	Phishing campaigns & simulations, dark web monitoring, vulnerability scanning, risk assessments, security audits, compliance, endpoint hardening, network segmentation
SIEM & Tooling	Splunk, Security Onion, Wireshark, ServiceNow
Languages & Cloud	Python, Bash, PowerShell, SQL, AWS

CERTIFICATIONS

CompTIA Security+ • ISC2 Certified in Cybersecurity (CC)

PROFESSIONAL EXPERIENCE

Cybersecurity Specialist — Secure Halo | Silver Spring, MD

July 2026 – Present

- Lead phishing campaigns, dark web monitoring, and vulnerability scans for multiple client environments, translating findings into prioritized remediation guidance.
- Prepare and present clear, concise reports to clients, communicating risk and recommended controls to both technical and executive audiences.
- Developed an incident response program for clients, defining escalation paths, containment procedures, and communication protocols to reduce response time and minimize business impact.

Tier 1 SOC Analyst — City of Rexburg | Rexburg, ID

August 2025 – April 2026

- Monitored and triaged security alerts using Splunk and Security Onion, reviewing endpoint, network, and authentication activity to identify suspicious behavior and potential incidents.
- Conducted packet and traffic analysis with Wireshark to investigate anomalous network activity and support incident root-cause analysis.
- Logged incidents and managed tickets in ServiceNow, documenting investigation steps and escalation notes to enable timely response and improve SOC ticket quality.

Cybersecurity Intern — Madison County Sheriff's Office | Rexburg, ID

January 2026 – April 2026

- Configured security settings and deployed updates across new computer systems in county buildings, strengthening endpoint protection for critical infrastructure.
- Redesigned network topology with segmentation and access controls, enhancing the overall network security posture.

Cybersecurity Intern — Pure Light Botanical Beauty | Rexburg, ID

July 2025 – December 2025

- Designed and implemented a company security framework, defining security responsibilities for 10 employees across the organization.
- Developed and delivered cybersecurity training on four core topics: MFA, password hygiene, password management, and phishing awareness.

EDUCATION

Brigham Young University-Idaho | Rexburg, ID

Bachelor of Science, Cybersecurity • Minor: Computer Programming • Expected: April 2026
